## **AUDITION RECORDING GUIDELINES**

- Each required work is to be recorded separately, and filmed in one continuous, unedited take. All orchestral excerpts for each round are to be recorded together in one continuous take.
- Applicants are to clearly state their full name at the beginning of their first recording.
- Record each required work for your instrument in full, including cadenzas, where applicable.
- Works with piano accompaniment must be performed with piano, unless stated otherwise in the requirements. Orchestral excerpts are to be performed without accompaniment.
- Please be advised that in submitting material, applicants should be aware of the sound quality of their recording/s, especially the clarity and detail of their instrument's sound and dynamic range. Where possible, recordings should be made using an external microphone in a reasonably-sized room, however not too distantly.
- ANAM acknowledges the limitation of and access to standard recording facilities and will accept recordings filmed in multiple locations.
- The ANAM panel reserves the right to hear whole or part of any work.

## **RECORDING AND FILE SETTINGS**

All files are to be recorded in a high-quality format but of an appropriate file size for uploading.

ANAM recommends checking the following settings on your recording device before recording:

- Please set your video resolution to 720p or 1080p, with a frame rate of 25fps.
- If your device has independent audio settings, aim for the highest bitrate possible (320kbps mp3 or 24 bit/48 kHz WAV).

All submissions are to be video files, uploaded and submitted in **.mp4 format at 720p (720x1280) or 1080p (1920x1080) pixel resolution**. Any other file format will not be accepted.

Each file should be smaller than 1gb. If your file size is too large, use a third-party program (i.e. Handbrake) to compress the size of your video.

## **OPTIMAL PLACEMENT OF MICROPHONE**

You may need to experiment to find the best placement for an external microphone, but a general starting point is to place a microphone where the instrument sounds best to the ear. This is often a spot between 1 and 2 metres in front of your instrument, and at approximately head height.

If you feel that the recorded sound is lacking clarity, high frequency detail, or you are hearing too much of the reverberation of the space, try moving the mic closer. If the sound is too harsh or if excessive mechanical noise is audible (bow noises, key noise etc.), try moving the mic further away.
