AUDITION RECORDING GUIDELINES

- Each required work is to be recorded separately, and filmed in one continuous, unedited take. Orchestral excerpts are to be recorded together in one continuous take.
- Applicants are to clearly state their full name at the beginning of their first recording.
- Record each required work for your instrument in full, including cadenzas, where applicable.
- Works with piano accompaniment must be performed with piano, unless stated otherwise in the requirements. Orchestral excerpts are to be performed without accompaniment.
- The ANAM panel reserves the right to hear whole or part of any work.
- ANAM acknowledges the limitation of and access to standard recording facilities and will accept recordings filmed in multiple locations.
- Please be advised that in submitting material, applicants should be aware of the sound quality of their recording/s. Where possible, recordings should be made in a reasonably sized room and use an external microphone.
- All submissions are to be video files, submitted in .mp4 format at 720p (720x1280) or 1080p (1920x1080) pixel resolution. Any other file format will not be accepted.

RECORDING AND FILE SETTINGS

All files are to be recorded in a high-quality format but of an appropriate file size for uploading.

ANAM recommends checking the following settings on your recording device before recording:

- Please set your video resolution to 720p or 1080p, with a frame rate of 25fps.
- If your device has independent audio settings, aim for the highest bitrate possible (320kbps mp3 or 24 bit/48 kHz WAV).
- Recordings must be uploaded as .mp4 files.

Each file should be smaller than 1gb. If your file size is too large, use a third-party program (i.e. Handbrake) to compress the size of your video.

OPTIMAL PLACEMENT OF MICROPHONE

You may need to experiment to find the best placement for an external microphone, but a good general starting point is where the instrument sounds best to the ear - often a spot between 1 and 2 metres in front of your instrument, and at approximately head height. You will need to adjust this depending on the space you are performing in.

If your recording is lacking clarity, move the mic closer. If your recording is sounding harsh or if it is picking up too much noise (eg. bow scraping, key noise), move the mic further away.
